Summary

- o 2 years of experience building and maintaining responsive websites and applications for major global brands from France
- o Was a member of a team that launched a successful company's product – PixelRetail. Developed user interface features, also participated in designing UI/UX (in Figma) for dashboard, slides, and forms. Split compounded system to separate applications
- o Accomplished numerous tasks of various complexity levels: composite responsive layouts, testing, authentication, advanced search, filters, full CRUD features of entities

Employment

Front-end engineer

Studio.gd, Paris, France

Dec 2020 – Present

E-commerce - online shop 50k+ items (Next.js, Redux, Redux Toolkit, Tailwind)

- developed multi-step authentication form
- implemented and optimized search feature with related categories/items suggestions
- handled existing API into render of FAQ section with nested pages including search by questions

News website (WordPress)

- took the leading position on the project, coordinated the work of FE and BE
- communicated with client stakeholders, clarified technical solutions to meet client's requirements

PixelRetail - system for managing content on digital signage (React, Redux, Material UI, Symfony)

- extracted 30% of the code into a separate application which increased performance and twice speeded up displaying changes
- developed new user-facing features
- conducted A/B testing to identify bugs and UI improvements

Admin panel for the dating app (React, Redux, Material UI, Cypress)

- developed new user-facing features
- covered 35% of the project with tests

Corporate websites on CMS (WordPress, Drupal, Custom Themes)

- set up projects with Gulp, Webpack, Prettier, ESLint
- made complex responsive layouts of user-contributed blocks
